Cox PH
Random survival forest
Bayesian Weibull
Coverage: thick range = observable bounds; symbol / whisker = IPCW / CI.
Width: symbol = median; thick range = IQR; whisker = median CI.
Blank rows: small group suppressed or no observations.
Basal (n=59)
Her2 (n=54)
LumA (n=172)
LumB (n=108)
Normal (n=36)
claudin-low (n=63)
unknown (n=3; suppressed)
